

# OSG - Oran Safety Glass

Front Laminated Windscreens

## Oran Safety Glass

### Enhancing Visibility

The increased size – and enhanced visibility – of today's windshields are directly related to a car body's structure and strength and are posing major challenges to windshield fabricators. Drawing upon its extensive experience in fabricating laminated safety glass, Oran has the technological know-how to meet these new demands and is producing the whole range of safety and aesthetic specifications that today's windshield must embody. Products include more than 1000 different windshields for virtually all car and truck models as well as agricultural vehicles.

### Added Value Production

Oran is the leading producer of automotive replacement glass in Israel, a position that is maintained for 25 years because of its success in meeting the client demands irrespective of how complex the production specifications or how tight the production schedule. Exporting more than 50% of its production to leading ARG suppliers in Europe as well as several OEMs, Oran offers clients the production flexibility of both short and large series at competitive and quick turnaround time.

### Assuring Quality

Knowing that lives can depend on its windshields, Oran implements a zero defect policy and maintains a full range of laboratory testing facilities to ensure total quality control. All Oran products comply with international standards and the company is audited on a regular basis by the British Standards Institute SA and SII. The 14,000 sqm plant, located just outside of Jerusalem, operates according to ISO 9000-2000 and ISO 14000.
