

# Oran Safety Glass Inc.

## Company Profile

## About Us

Oran Safety Glass (OSG) is a world-leading glass manufacturer, producing a complete line of bullet, blast and forced entry resistant window products for all military and civilian applications, both vehicular and architectural. We offer our clients a broad range of high-quality, flat or curved transparent armor in either no-spall or low-spall\* configurations. Our complete range of innovative products is uniquely designed and constructed to meet customers' precise specifications, guaranteeing complete satisfaction. Combining product diversity, advanced technical expertise and commitment to customer satisfaction, we have been a leading provider of security glass worldwide for over 25 years.

OSG's state-of-the-art 82,000 square-foot U.S. manufacturing facility was established in 2006 to serve the growing needs of the U.S. military and other U.S. market segments, and to complement our Israel-based parent company which serves international markets. Both advanced facilities adhere to the highest international quality standards and are ISO 9000-2000 certified.

## Field-Proven Excellence

Backed by our principal (250,000 square-foot) facility in Israel, OSG benefits from manufacturing experience and precision engineering expertise. Joining forces with military professionals around the world, the company has developed highly effective, field-proven solutions. Our products can be found on military vehicles and security buildings across the globe and are well-documented as having saved countless lives as well as assisting in the protection of valuable assets. Drawing from the company's leadership within its field for more than two decades, OSG is positioned as a front runner within the US market, providing complete security solutions for both Army and Marine Corps tactical wheeled vehicles.

## Security Solutions for Tomorrow

Aware of the rapid changes within the security sector and acknowledging ever-increasing threats in the global arena, our expert Research & Development team continually investigates and tests the latest market trends, having ourselves pioneered many of our industry's most important innovations. Technical excellence is a fundamental component at our company, largely necessitated by the challenges we face on a daily basis. OSG constantly introduces innovative products that assure protection against an array of threats and at ever-increasing levels. At the same time, we develop features that are required by the varying conditions of today's global marketplace, including heating/defrosting, diminution of 'spider cracks', attenuation or transmission of electromagnetic fields, infrared and other wavelengths and abrasion resistance.

## Performance, Service, Reliability

All OSG products assure optimal performance, an essential asset when lives are at stake. Our company also offers the highest level of service: from product design and development through production and quality control to timely delivery from two different continents. We are here to clear the way, providing the finest and most reliable security solutions for tomorrow- today.

### \*No spall / Low spall

Our armored transparencies come in two variations, no spall and low spall. No spall transparencies are designed to offer total prevention of glass fragmentation and undergo a glazing treatment on the outside face while the inner facing consists of advanced thermoplastic materials. Low spall products allow a minimal amount of small glass fragmentation and include an additional thin layer of glazing on the inner facing.
